

Hogan Health Care, P.C.
Hogan Advanced Liposuction Center

Additional Surgery Necessary

There are many variable conditions in addition to risk and potential surgical complications that may influence the long-term result of Liposuction. Even though risks and complications are unusual, the risks cited are associated with lipoplasty procedures utilizing suction, laser and/or ultrasound technologies. Other complications and risks can occur. If complications should occur, additional surgery or other treatments may be necessary. The practice of medicine is not an exact science. Although good results are expected, there is no guarantee or warranty expressed or implied on the results that may be obtained.

Financial Responsibilities

The cost of surgery involves several charges for the services provided. The total includes fees charged by your doctor, the cost of surgical supplies, anesthesia, laboratory tests, and possible outpatient charges, depending upon where the surgery is performed. Due to the proprietary nature and expense of the technology utilized, your bill may reflect a separate and additional fee for the use of VASER equipment specific to your procedure. Additional costs may occur should complications develop from the surgery. Secondary surgery or hospital day-surgery charges incurred due to remedial surgery are also the responsibility of the patient.

Disclaimer

Informed consent documents are used to communicate information about the proposed surgical treatment of a disease or condition along with disclosure of risks and alternative forms of treatment(s). The informed consent process attempts to define principles of risk disclosure that should generally meet the needs of most patients in most circumstances.

However, informed consent documents should not be considered all inclusive in defining other methods of care and risks encountered. Your surgeon may provide you with additional or different information that is based on all the facts in your particular case and the state of medical knowledge.

Informed consent documents are not intended to define or serve as the standard of medical care. Standards of medical care are determined on the basis of all the facts involved in an individual case and are subject to change as scientific knowledge and technology advance and as practice patterns evolve.

It is important that you read the above information carefully and have all of your questions answered before signing the consent form.
